

savotex SLIDES ADD-ON

PowerPoint® Management and Output via censhare

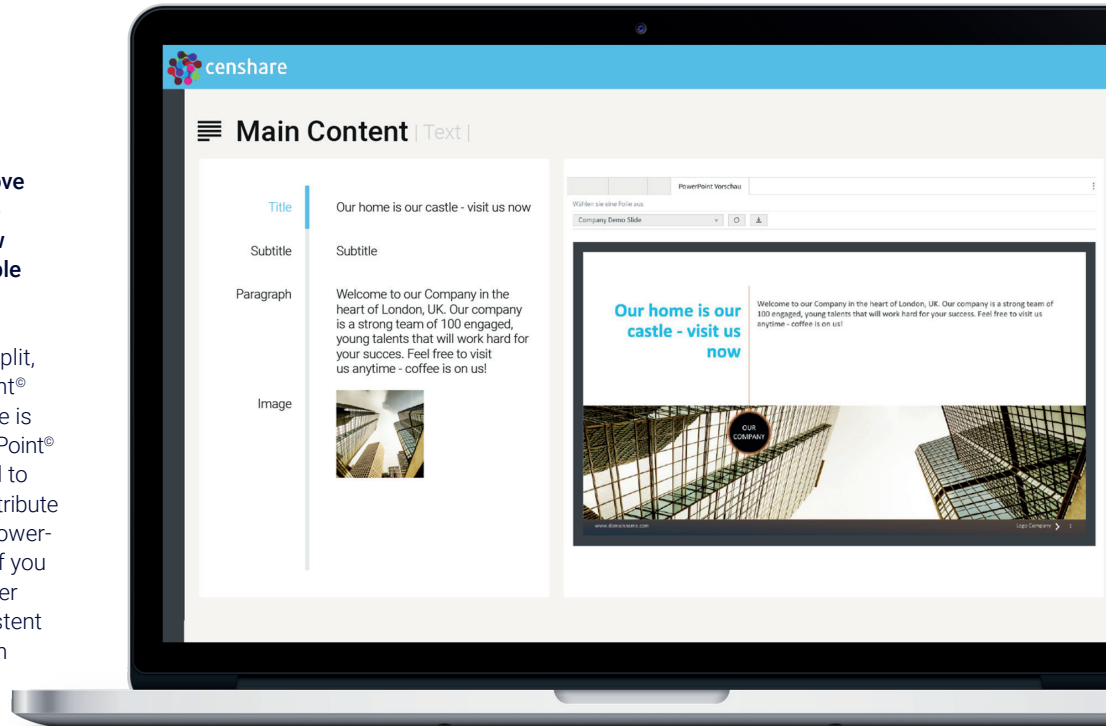

censhare

GOLD PARTNER

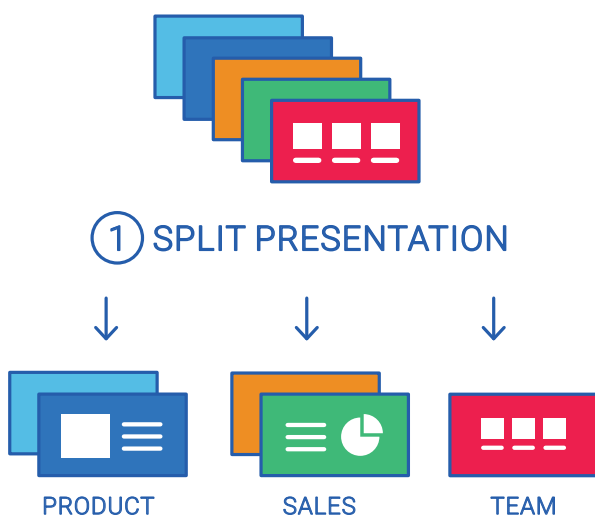

A CENSHARE INTEGRATION

Savotex has been working to improve your content first strategy and take PowerPoint® management to a new level – all within and fully compatible with your current system.

Use the Savotex Slides Add-On to split, manage and merge your PowerPoint® slides directly within censhare. There is more to it: the Add-On will add PowerPoint® as a completely new output channel to your censhare ecosystem. Easily distribute your censhare data into fully valid PowerPoint® files – even fully automated if you wish. This way the Add-On will further expand your possibilities to a consistent communication among presentation slides – staying in line with all your other communication.

POWERPOINT® MANAGEMENT

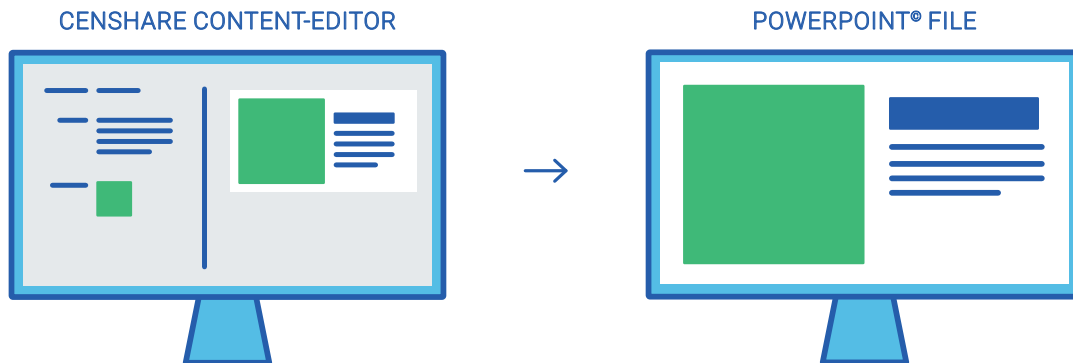

With just a few clicks in the new censhare wizard you may now split your presentations by slide or by section - that way you'll be able to upload your existing PowerPoint® corporate pool and manage each slide/section separately.

Simply use censhare relations to plan new sets of presentations using the existing slides and merge them to a valid PowerPoint® presentation ready to use!

POWERPOINT® OUTPUT CHANNEL

③ NEW SLIDE GENERATOR

Using censhares Content-Editor you are now able to preview your content in the new output channel: a PowerPoint® preview on the right part of the editor. Your changes will have an immediate effect on the slide preview - giving you the power to always monitor the results and download your presentation file.

AT A GLANCE

Slide planning

Plan your slide sets to create new presentations on click

PowerPoint® Output

Output your XML content into slides

Use structured content

Choose to use standard content structure or your own

Transformation ready

Place content from related assets (i.e. product assets)

Supports croppings

Re-use censhares images croppings for a fitting placement in PowerPoint®

Multi-language support

Use censhares language variants to create multilingual slides with ease
