

censhare connector for Microsoft Office®

censhare Add-In for Microsoft Office® applications

The censhare connector by Emmet Software Labs is an extension for the Microsoft Office® package that allows you to use the data of your censhare system easily and efficiently. Don't waste time by switching between programs but start their asset search directly from your Microsoft Office® product instead. The search results maps the Rules & Rights system of the censhare server thus containing only assets you have access to. Place assets such as images and videos via drag & drop.

Advantages:

- ✓ Microsoft Office® integrated full-text search
- ✓ Search filters for targeted searching of relevant assets, such as mimetypes
- ✓ Sortable result list
- ✓ Placing assets via drag & drop
- ✓ Efficient working, switching between programs is not necessary
- ✓ Automatic conversion of incompatible formats, e.g. Adobe Photoshop (PSD)
- ✓ User authentication and taking into account the rules/rights
- ✓ Consideration of an individual censhare configuration
- ✓ Bandwidth reduction by caching of assets
