## Slides Connector

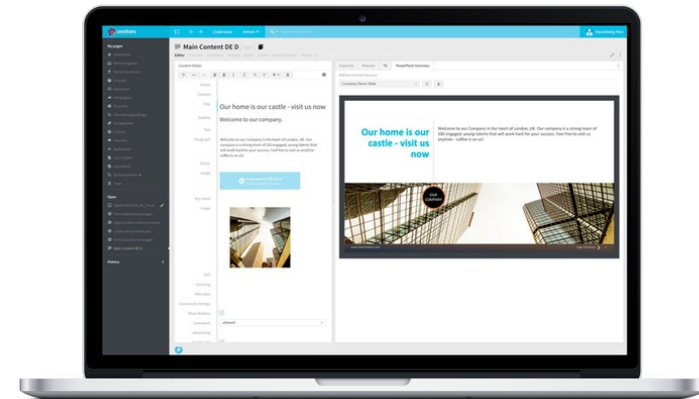

**Get your PowerPoint® craziness under control.**

With the Slides Connector, you manage, edit and create your PowerPoint® presentations for a consistent communication directly in censhare.

An integrated wizard allows you to easily split presentations by slide or by section during import for central administration. And there's more: thanks to a new output channel, you can export desired slides fully automatically into native PowerPoint® presentations.

- Benefit from the censhare content editor to display your structured content directly within a slide
- Moreover, add content from related assets, such as product, personal or project information
- Use existing censhare image sections or localizations through censhare language management
- Simply merge any slides by relation and create completely new slide sets as PowerPoint® files at the push of a button

Organize your PowerPoint® presentations centrally in censhare today. We will be happy to give you free guidance!

We are looking forward to your inquiry: [sales@savotex.com](mailto:sales@savotex.com)
