

## PDF CREATOR

### Scaling PDF creation in an automated and efficient way.

With the PDF creator, you can conveniently create PDF files from assets directly in censhare.

Thanks to the PDF creator, you can generate PDF files from layout and outputs without any detours and with just a few clicks. You can automatically overwrite existing PDF files while retaining all metadata and channels. This allows quick access to all created PDF files, enabling you to forward them directly.

Using the PDF creator helps to reduce potential errors and make workflows in censhare more efficient and automated. This allows you to save time and concentrate on other important tasks.

### Functions

- Free selection of PDF profiles
- Automated PDF filing
- Automatic replacement of existing PDF files and simultaneous transfer of metadata
- Applicable to asset types "layout" and "output" as well as to one or more assets
- Multiple PDF variants selectable in one action
- Indesign server required
