Censhare Academy

Online & On-Demand

Complete training at your own pace, whenever and wherever suits you.

Get Certified

Industry-endorsed credentials that validate your know-how and elevate your team's skills.

Ideal for Partners

Create and implement highly targeted custom solutions for your customers with confidence.

Whether you are an experienced Censhare user or just starting out, you can access on-demand training content relevant to your role, area of focus, and level of expertise — when and where it's convenient for you. As part of Entirely's open ecosystem, the Academy also brings you content from leading MarTech solutions including Marmind, Elaine, Epoq, and Facelift.

Courses

Web Client 101: Interface and Fundamentals

Gain a deep understanding of assets, relations, variants, and workflows — and the Web Client's key features.

- The Workspace
- Quick, Detailed & Expert Search
- Save, Share and Edit Searches
- Creating & Managing Assets
- Working With Metadata
- Asset Check In and Out
- Working With Workflows and Tasks
- Knowledge Check

Introduction to Product Information Management

Unlock the potential of Censhare's PIM capabilities: data models, key features, and best practices.

- What is a Product? / What is PIM?
- Censhare's Key PIM Features
- Classification & Data Model (Parts 1 & 2)
- Product Feature & Value Inheritance
- Closing Thoughts and Best Practice
- Knowledge Check

The Administration Client

A thorough introduction to user management, master data administration, domains, assets, features, and workflows.

- Admin Mode in The Censhare Web Client
- The Administration Client
- User Administration
- Domains
- Assets & Workflows
- Relations and References
- Asset Properties and Features
- Knowledge Check

Back-end Solution Development Best Practices

Explore fundamental aspects of Censhare systems design — a key element in back-end solution development.

- Developer Tool Set-up
- Create and Execute Commands
- Server Actions & Asset Automation: Custom Code
- CDB Queries & Event Handling
- Core Databases & File System
- XSLT, API, XPATH & Extension Basics
- Transformation Module via REST
- Data Interfaces & Import Demo
- Knowledge Check

Front-end Solution Development Best Practices

Learn Web Client UI/UX design decisions and best practices within the Censhare framework.

- UI/UX Overview & Components
- The Workspace Concept
- Customizing Metadata Overview
- Metadata Widget & Directives
- AngularJS Templates & Debugging
- Property Widget Demonstration
- Knowledge Check

Introduction to Censhare Cloud

Explore Censhare Cloud's robust architecture and advanced features. Equip yourself to transform workflows and entire business landscapes.

- Censhare Classic Operational Model
- Cloud Native Landscape
- Censhare Cloud Tech Stack
- Working with Censhare Cloud
- Censhare Cloud Operational Model
- Knowledge Check

Introduction to Node-RED | Censhare Cloud

In-depth training on Node-RED features, context & scope, core nodes, and how to use them.

- Working with Node-RED
- The Node-RED Layout
- Context & Scopes
- The Core Nodes
- Node-RED use case – Hotfolders integration
- Major Advantages

REST APIs | Censhare Cloud

Discover Censhare's API library for cloud-based tasks: asset creation, deletion, modification, and authentication.

- REST APIs & Authentication
- Configuring Authentication for API calls
- Asset Management using APIs
- Creating Assets using REST APIs
- Deleting Assets using REST APIs
- Modifying Asset Properties using REST APIs
- REST APIs for Solution Development

Advanced Node-RED Flows | Censhare Cloud

Create advanced Node-RED flows using standard and Censhare-specific nodes, Git operations, and query services.

- Node-RED Implementation
- A Toolset for Censhare Cloud
- Asset Management using Node-RED
- Node-RED App vs Node-RED Dev Instance
- Git and Censhare / Using Git with Node-RED
- Query Services & Subflows
- Hotfolder Integration use case

Knative Functions | Censhare Cloud

Enhance your understanding of serverless computing and Knative functions within the Censhare Cloud ecosystem.

- Create, Deploy and Leverage Client Libraries
- Knowledge Check

Configuration Management | Censhare Cloud

Make minor updates to custom solutions without redeploying the whole solution.

- Configuration Management Overview
- Configuration Management from the Cockpit

Observability Tools | Censhare Cloud

A guided tour through tools used to monitor and observe custom functions, Node-RED flows, and services in Censhare Cloud.

- What is Observability?
- Introduction to Observability tools
- Prometheus and Grafana
- Displaying Metrics using Prometheus
- Introduction to Grafana & Kibana
- Accessing Logs in Kibana
- Debugging applications using Kibana and Jaeger

Pricing
